

Adding Corley's PDF settings to your Acrobat Distiller's Default Settings will allow you to create PDF files that can be used with Corley's workflow. Adding Corley's settings also increases the probability of your files arriving "trouble free." This will save you time and money.

To add the Corley default settings to Acrobat Distiller, do one of the following:

- Open Acrobat Distiller and drag the Corley_Acro.joboptions file into the Distiller window.
Acrobat Distiller 6 Note: If the Adobe PDF Settings dialog box opens click OK.
- Open Acrobat Distiller and in the Settings menu go to Add Adobe PDF Settings. Navigate to and choose the Corley_Acro.joboptions file.
- Drag the Corley_Acro.joboptions file directly into the your Adobe PDF/Settings folder.

Once you have added these default settings to Acrobat Distiller they will remain one of your Default Settings choices and you will be able to select this option whenever you would like to create a PDF for Corley Printing Company.

Note: The name of the presets file indicates the version of Acrobat Distiller that it has been specifically designed for. For example, Corley_Acro6.joboptions is the correct file for Acrobat Distiller Version 6.
